

**STATEMENT OF INDONESIA
AT THE HIGH LEVEL SEGMENT OF THE COP, CMP, CMA
KATOWICE, 12 DECEMBER 2018**

Thank you Mr. President,

Indonesia would like to congratulate Poland for assuming the COP-24 Presidency. We thank the Government and the people of Katowice for their hospitality.

Indonesia believes that we gather here with the commitment to complete our mandate from Paris. We are confident, that under your very able leadership, Mr. President, we could adopt a balance – comprehensive Paris Agreement rule book, resulting from a transparent, inclusive, and country driven processes, and applicable to all with the principle of CBDR-RC.

Mr. President,

Indonesia is one among countries which ratified the Paris Agreement, less than one year after the adoption of the agreement. We have set an ambitious unconditional target of 29% up to 41% conditional target of emission reduction from 2030 BAU scenario, with forestry and energy as the major targeted sectors. Adaptation is an important part of our NDC, with three target area of climate resilience, namely economy, social and livelihood, and lastly ecosystem and landscape.

Our national values and goals will enable us to meet our commitment under the Paris Agreement, mandating that all citizens have the right for good environment, and that natural resources are governed by the states for the greatest prosperity of the citizens in Sustainable way, as reflected in our Constitution 1945's Articles 28 H and Article 33. Under President Joko Widodo administrative government, relevant policy reforms have been carried out, including legal the recognition of the rights of *Masyarakat Hukum Adat* or local natives, improving access for local communities to forest land and resources through Social Forestry, enhancing Forest Management Unit at site level, and implementing joint adaptation and mitigation at the grass root levels. There are also efforts in energy sector through the development of renewable energy and policy to enhance the quality of fossil fuel and coal. The increasing roles of Non-Party stakeholders are encouraging and very dynamic, from the sub-national government, private sectors, civil societies to grassroots, as well as the supports from the parliament,

and judiciary for enforcement. In tracking our progress, we established a National Registry System to record and monitor all climate actions and their respective resources, as well as on the final stage of financial channeling arrangement.

Mr. President,

The recent IPCC's Special Report on Global Warming of 1.5° C, highlighted the importance of early action against climate change, which makes the role of pre-2020 ambition even more critical. Therefore, Indonesia would like to urge our developed country partners, to meet their pre-2020 commitment, and to rapidly increase their ambition in meeting the objectives of the Paris Agreement, both in emission reduction and in providing means of implementation, to developing countries.

Mr. President,

We recognized, the importance for all countries to transform, to low emission and climate resilience development pathway. Indonesia, like many other emerging economies, faces challenges in balancing between meeting international commitment and achieving national development objectives. Indonesia, would like to see fair and just international policies that are conducive for both international and national interests. We could not accept the use of environmental issues including climate to be a means of disguise trade discrimination against developing countries.

In closing, Mr. President, we should not allow any attempt to renegotiate the Paris Agreement. Indonesia assures you our good faith to achieving concrete results in Katowice, and looks forward to support your leadership by working together constructively with other Parties.

Thank you Mr. President.
