

Economics

1. Economic aspects

Financing & delivery { costs of mitigation
benefits of mitigation
costs of adaptation

{ costs of climate change much higher

Gaspari
Moros

Min. Lomoto Marshall
Benin / Micronesia
Mozambique

highest return
→ 1) benefits of mitigation
technology boost
sound management
of resources
→ 2) much higher
unaffordable costs
of climate change

2. Coherence

International
National

adaptation: mainly forests, water, biodiversity
combat desertification

mitigation

international / national

Source: Vulnerable (Summary C3) with this (C9)

lower / higher
abundances

3. Future

Further action

1. cancel frogs

3. Kyoto

We remember
Not just
work

2. we still hope / 1st step (Ykoike)

6. Convention part 2

→ we have to go much further
all together (Mozambique)

differentiated, but common responsibility

Ready to
implement
4

5

Not only COPs
in each of our

political

investment - financial
personal

decisions there is
a climate change
aspect.

TREC

8 + bds for the future, beyond Kyoto

invest the future

→ we still have to

L 26 add 1
